

WISEMAN SIRIRO

+4793081060 wisemansiriog@gmail.com Oslo, Norway in LinkedIn GitHub Portfolio

SUMMARY.

Self-driven professional with a strong focus on innovation and sustainability in engineering, technology, and business. Experienced in international and cross-industry environments, adept at solving complex problems with precise and creative solutions. Possesses expertise in analytics, project management, data-driven decision-making, communication, and problem-solving, complemented by a proactive and collaborative mindset. Skilled at combining technical expertise and strategic thinking to support organizational success while continuously developing advanced, high-impact solutions, delivering measurable results through continuous process improvement and optimization.

EDUCATION.

Worldquant University (WQU)

Master of Science in Financial Engineering (Remote)

09/2025 – 08/2027

Washington DC, USA

European Erasmus Mundus Programme (ENISE, PoliTo, NTNU)

09/2023 – 09/2025

Erasmus Mundus Joint Master Degree in Manufacturing 4.0 by Intelligent and Sustainable Technologies (META4.0) [LINK]

France, Italy, Norway

Norwegian University of Science and Technology (NTNU)

09/2023 – 09/2025

Master of Science in Sustainable Manufacturing, specializing in Digital Manufacturing. [LINK]

Gjøvik, Norway

Polytechnic University of Turin (PoliTo)

09/2023 – 09/2025

Master of Science in Materials Engineering for Industry 4.0. [LINK]

Torino, Italy

École Centrale de Lyon (ENISE).

09/2023 – 09/2025

Master of Science in Mechanical Engineering. [LINK]

Saint-Étienne, France

Shanghai Jiao Tong University (SJTU)

06/2024 – 07/2024

Emerging Semiconductor Devices and Sustainable Innovations (Course ESDTSI). [LINK]

Shanghai, China

European Institute of Leadership and Management (EILM)

11/2022 – 11/2023

Mini-MBA (Master of Business Administration) [LINK]

Dublin, Ireland

North China Electric Power University (NCEPU)

09/2019 – 06/2023

Bachelor of Science in Mechanical Engineering. [LINK]

Beijing, China

CERTIFICATIONS.

Automation	Risk Management	Python Programming	Cybersecurity	Structured Query Language (SQL)
Data Science	Quality Control	Fundamentals of Lean	Robotics and Controls	Good Manufacturing Practice (GMP)
Data Analytics	Project Management	MATLAB Fundamentals	Consultant Program	McKinsey & Company Forward Program
Circular Economy	Machine Learning	Software Engineering	Project Coordination	Operations Industrial Engineer

EXPERIENCE.

Data Engineering and Management (Intern)

07/2026 – 09/2026.

MKY GLOBAL FORWARDING.

Kraków, Poland.

- Performed data entry, data cleaning, validation, transformation, integration, and maintenance to ensure data accuracy, quality, and integrity across operational systems. Supported ETL/ELT processes, data pipelines, reporting, business intelligence, and data analytics using Microsoft Excel, SQL, Python (Pandas), Power BI, Tableau, Power Query, Power Pivot, Snowflake, Microsoft Fabric, Azure Data Factory, dbt, Git, and Databricks, managed operational documentation and shipment records, maintained data governance standards, and improved data quality, process automation, and operational efficiency. Performed UX/UI design and prototyping using Figma, Adobe XD, Sketch, and Miro to improve user experience, workflow efficiency, and data visualization interfaces.

AI & Innovation Sales Partner (Intern)

04/2026 – 06/2026.

GADDR & NEURTASK.

Stockholm, Sweden.

- Built and managed a B2B sales pipeline for AI, SaaS (Software as a Service), and digital transformation solutions by engaging C-level executives, founders, and product leaders across industries. Conducted discovery calls and needs assessments to identify AI and automation opportunities, developed Return on Investment (ROI)-driven proposals, and positioned tailored AI implementation strategies. Collaborated with engineering, product, and design teams to deliver scalable solutions while managing client relationships, follow-ups, and pipeline optimization. Contributed to go-to-market initiatives, market research, competitive analysis, and business growth strategies.

Manufacturing Engineer (Intern)

12/2025 – 02/2026.

DIAGEO.

London, United Kingdom.

- Completed a hands-on training project reviewing the full bourbon production process for the supply chain and manufacturing teams using SAP and Excel. Analyzed process deviations using Minitab to support Quality Assurance, Digital Twin modeling, and Life Cycle Inventory (LCI), evaluated downtime data, and improved operational efficiency using Tableau while tracking project progress with Jira, driving data-informed decisions across manufacturing operations effectively.

Project Manager (Intern)

09/2025 – 10/2025.

SIEMENS MOBILITY.

Munich, Bavaria, Germany.

- Completed a project management initiative focused on KPI development and dashboard management by executing project activities using Microsoft Project and Smartsheet, while overseeing scope, schedule, and budget through SAP, Oracle, and Microsoft Dynamics 365. Analyzed performance data and created dashboards in Power BI and Excel. Strengthened customer and stakeholder alignment through Outlook and Microsoft Teams, and carried out formal risk assessments utilizing Primavera Risk and ARM.

Agentic AI Intern

06/2025 – 07/2025.

NAPBLOG.

Dublin, Ireland.

- Built and implemented AI-driven workflows using n8n, creating and optimizing custom integrations and marketing automations across platforms such as Zapier, Salesforce, and other CRMs. Collaborated with marketing, development, and content teams to streamline processes, improve operational efficiency, and support ethical, human-centered digital marketing campaigns. Assisted in maintaining documentation and provided technical insights to enhance internal systems.

Operations Industrial Engineer (Intern)

04/2025 – 05/2025.

SIEMENS MOBILITY.

Munhall, Pennsylvania, United States.

- Conducted detailed time study analysis for a key assembly process of the Aurora Express high-speed train using AutoCAD and MTM to identify bottlenecks and inefficiencies. Proposed and developed data-driven layout changes to the assembly line to improve workflow, reduce delays, and enhance overall production efficiency using Arena Simulation and Excel. Applied industrial engineering methods to optimize manufacturing processes in line with sustainability and performance targets, collaborating with engineering teams and leveraging Siemens NX and Minitab to implement improvements with immediate and long-term benefits.

Data Analyst Internship Programme.

12/2024 – 01/2025.

UPTRAIL.

London, United Kingdom.

- Built strong technical skills in data analysis, reporting, and business intelligence. Analyzed real-world datasets to interpret market trends and evaluate business performance. Gained hands-on experience with Python, Alteryx, SQL, Power BI, Tableau, and Excel for data manipulation and visualization. Developed a solid understanding of data governance, regulations, and compliance standards. Designed interactive dashboards to communicate insights effectively to stakeholders. Collaborated with cross-functional teams to translate data insights into actionable business strategies. Designed UX/UI wireframes and prototypes using Figma, Adobe XD, Miro, and Sketch.

Mechanical Design Engineer (Intern)

10/2024 – 11/2024.

NEXUS NOVA INNOVATIONS.

Des Moines, Iowa, United States.

- Led mechanical design, specification, project coordination, process mapping, planning and engineering efforts for two key prototype iterations, achieving a 10% improvement in design efficiency and supporting accelerated product development. Gained hands-on experience with CAD tools such as SolidWorks for 3D modeling and design optimization.

ESG, Solar & Hydrogen Supply Chain, Logistics, Procurement and Investment Research Intern.

05/2024 – 06/2024.

GREENTREE CAPITAL AND ASSET MANAGEMENT.

Shanghai, China.

- Researched solar and hydrogen investment projects using Excel, MATLAB, and Python, performing analyses, cost-benefit evaluations, forecasting, financial modeling, and supply chain logistics, and conducting risk assessments and tax incentive evaluations. Supported more than five projects by optimizing costs by 5% and aiding funding decisions. Participated in HSE audits and quality assurance.

Energy Research and Development (R & D) Intern.

06/2023 – 07/2023.

BEIJING XINYUAN ENERGY CO., LTD.

Beijing, China.

- Conducted energy production data analysis using MATLAB, Python, Simulink, and HOMER to optimize operations. Collaborated with cross-functional teams to ensure regulatory and safety compliance. Prepared technical reports and presentations. Supported planning, modeling, technical development, design, installation follow-up, testing, and documentation of renewable energy manufacturing systems, including electrical and automation components.

PROJECTS. [\[LINK\]](#) (More projects available in portfolio.)

- Real-Time Insurance Claims Data Engineering Pipeline using MongoDB, Airbyte, Snowflake, DBT, Python for Fraud Analytics.
- Modelling and Simulation for Sustainable Manufacturing using Discrete Event Simulation, System Dynamics, and AnyLogic.
- Flexible Automation, Artificial Intelligence, and Robot Project using Digital Twins, Python, Jupyter, and P-Rob 2 Robots.
- Hotel Booking Analytics and Revenue Intelligence Dashboard using Snowflake, Streamlit, Python, Power BI and SQL.
- Portfolio Optimization and Risk Assessment using Modern Portfolio Theory, Python, and Statistical Analysis.
- Ryanix ThermoAlert System – (Agentic AI automated machine monitoring system using n8n).
- Mechanical Design for Solar Air Collectors using SolidWorks, Simulink, and Microsoft Project.
- Techno-Economic Assessment of Solar PV System using PV*SOL and PVSyst.

LANGUAGE SKILLS.

English (Native)

Norwegian (B2)

French (B1)

Chinese (B1)

Danish (A1)

BACHELOR & MASTER THESIS PROJECTS.

- Master Thesis: Sustainability Assessment and Enhancement of Aluminum Production for Electric Vehicle (EV) Manufacturing Using Life Cycle Assessment (LCA) and Predictive Modeling. [\[LINK\]](#)
- Bachelor Thesis: Designing a space heating system with a solar air collector. [\[LINK\]](#)

TECHNICAL SKILLS AND COMPETENCIES.

- **Project and Enterprise Systems:** ERP Systems (SAP, Oracle, IFS), STELLA, Trello, Asana, Confluence, Jira, Microsoft Project, PLM Software (Teamcenter, Windchill, ENOVIA), Process Documentation, Process Improvement, Notion, Slack, ClickUp, Project Coordination.
- **Data Analysis and Statistics:** Power BI, Tableau, Alteryx, Spotfire, Grafana, Google Analytics, Adobe Analytics, R, MATLAB, Jupyter, Excel (VBA, Power Query), Data Science, Machine Learning, Artificial Intelligence, Statistical Analysis, Forecasting, Data Visualization, Data Management, Data Tracking, Data Integration, Data Pipelines, KPI Tracking, Quality Metrics, Reporting & Documentation.
- **Programming Languages:** SQL, JavaScript, C++, Python Libraries (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, TensorFlow, PyTorch), R, C#, Visual Basic, Microsoft Visual Studio.
- **Automation and Process Control:** SCADA, n8n, Zapier, CRM, PLC Programming (Siemens, Allen-Bradley), PID Tuning and Optimization.
- **IT/OT Integration and Virtualization:** VMware, Amazon Web Services (AWS), Microsoft Azure, Snowflake, Databricks, Google Cloud, Modbus, IoT Solutions, GitHub, Cloud Solutions, Microsoft Copilot, Generative AI, AR/VR, Building Management Systems (BMS).
- **IT and Office Tools:** Figma, Adobe XD, Sketch, Miro, Microsoft Dynamics 365, Microsoft Office (Excel, PowerPoint, Word, Outlook, Teams, Visio, Access, OneNote), Google Workspace (Gmail, Docs, Sheets, Drive, Calendar), Data Entry, Compliance Documentation, Process Mapping.
- **Engineering and Simulation Software:** FEA (ANSYS Additive Suite, ABAQUS, NASTRAN, Simulink), CFD (OpenFOAM, COMSOL Multiphysics, Fluent, STAR-CCM+), Process Simulation (ASPEN Plus, AnyLogic, gPROMS, HYSYS), Thermo-Calc, Granta Software, LCA (SimaPro, GaBi, OpenLCA), (LabVIEW, OriginLab, ImageJ), HVAC Simulation / Design (Trane Trace, Carrier HAP, EnergyPlus).
- **CAD and CAM Software:** AutoCAD, SolidWorks, CATIA, CREO, Siemens NX, Autodesk Inventor, Fusion 360, Rhino 3D, Onshape.
- **Quality Assurance and Compliance:** GMP, GDP, Quality Management, Quality Auditing, Quality Control, Quality Systems, Root Cause Analysis, SPC (Statistical Process Control), Continuous Improvement, Six Sigma, Lean Principles, 5S, Kaizen, Value Stream Mapping (VSM), Lean Manufacturing, Lean Process, Lean Initiatives, Business Process Management, Deviation Management, Risk Management.
- **Manufacturing and Quality Systems:** SAP QM, SAP EWM, Oracle WMS, TrackWise, Manufacturing Execution Systems (MES), Manufacturing Process Improvement, MSA (Measurement System Analysis).
- **Soft Skills:** Collaboration, Stakeholder Engagement, Effective Communication, Analytical Thinking, Problem Solving, Strategic Thinking, Adaptability, Initiative, Decision Making, Client Focus, Leadership, Attention to Detail, Results Orientation, Continuous Learning.

MANAGEMENT AND LEADERSHIP SKILLS.

- Supervised 10 operators; achieved 20% fewer defects and higher productivity.
- Led process improvement initiatives in manufacturing and retail environments.
- Mentored interns and junior team members, fostering skill development and academic growth.

VOLUNTEERING.

Point Foundation – BIPOC Scholars Community: Engaged in mentoring, advocacy, and peer-support initiatives.

Global Youth Biodiversity Network: Promoted biodiversity conservation and sustainability awareness campaigns.

NTNU University Buddy & Mentorship Program: Helped incoming international students adapt to academic and cultural life.

Global Citizenship Education Development (GCED): Led workshops promoting global awareness, cross-culture and sustainability.

European Erasmus Mundus Association: Assisted in organizing academic and cultural integration activities for international students.

CONFERENCES AND SEMINARS.

- Global Youth Adaptation Summit - Netherlands.
- Global Citizenship Education Conference.
- EU-US Defense and Future Forum.
- 10th Youth Leadership Workshop on Global Citizenship - Korea
- 7th Youth Leadership Workshop on Global Citizenship - Korea
- 28th International Congress on Sound and Vibration (ICSV) - Singapore.

NETWORKS AND MEMBERSHIPS.

- Point Foundation - BIPOC Scholars Community.
- Harvard University - Aspire Leaders Program.
- Society of Mechanical Engineers (NCEPU).
- European Erasmus Mundus Association.
- Caritas Ressurssenter Norway.
- World Economic Forum - Oslo.
- Rotaract Oslo International.
- Global Youth Biodiversity Network.
- Norwegian Petroleum Association (NPF)
- LIN - Likestilling, Inkluderende og Nettverk --
- Netball Club Oslo
- Honor Society.

HOBBIES.

- Topptur / Fjelltur (Mountain Hiking)
- Fotografering (Photography)
- Lagsport (Team Sports)
- Sjakk / Brettspill (Chess)
- Skiing (Langrenn/Alpint)
- Running and Cycling
